

Comparison of Healthy lungs, Pulmonary Contusion lungs and Pneumothorax.

By Fathima Ruhi Amisa

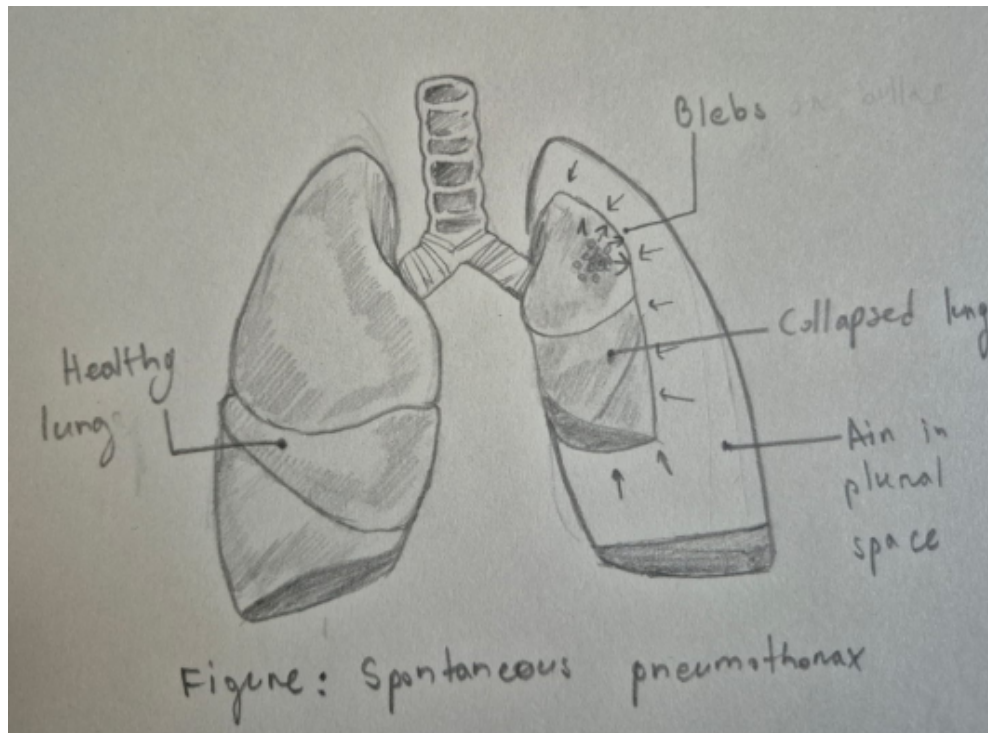

This diagram shows healthy lungs alongside lungs affected by contusion and pneumothorax.

Labels indicate the anatomical structures and the regions of damage (darkened to show contusions).

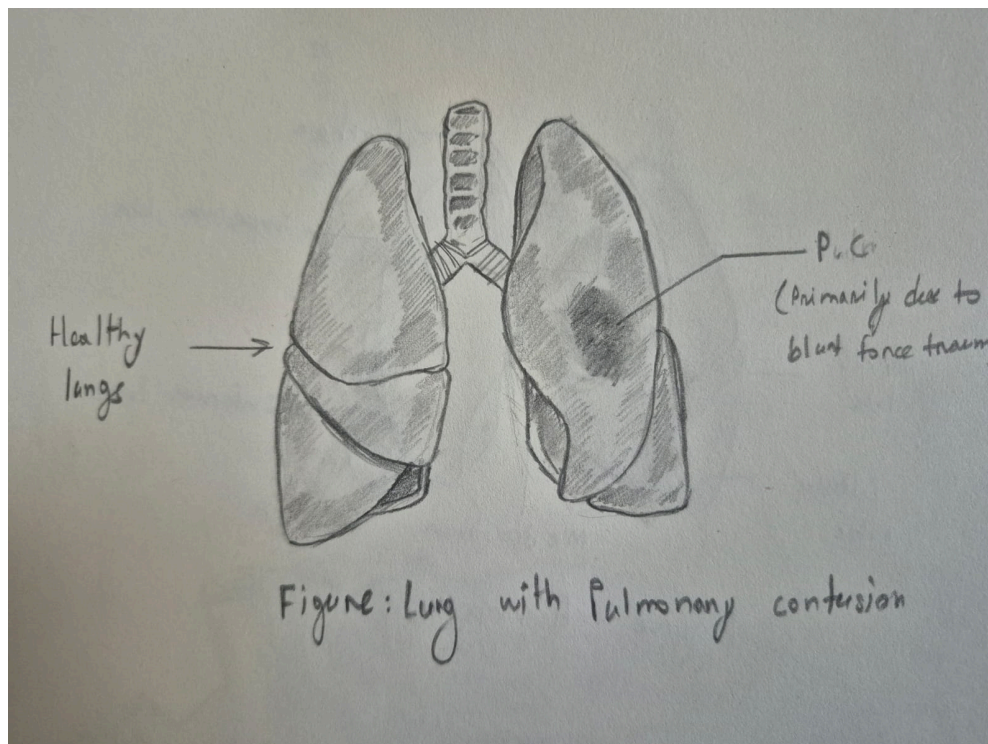

Part of a forensic anatomy illustration series exploring healthy vs. pathological organs.

Healthy lungs — smooth lobes, no trauma.

Spontaneous Pneumothorax — Collapsed lungs

Pulmonary contusion — bruised areas .
